PROFESSIONAL SUMMARY

Senior Software Engineer with 6+ years of experience in the full software development lifecycle. Expert in Angular, Node.js, and NestJS, with a strong background in CI/CD automation and Microservices. Proven track record at 3Pillar Global delivering scalable enterprise solutions for international clients. Specialist in optimizing deployment workflows and reducing operational overhead through Python-based automation and ChatOps.

TECHNICAL SKILLS

Frontend: Angular (v2+), TypeScript, JavaScript (ES6+), HTML5, CSS3, Flexbox/Grid.

Backend: Node.js, NestJS, Python (Flask), TypeORM.

DevOps & Automation: Jenkins, CI/CD Pipelines, ChatOps (Slack Bot Development), Git.

Databases: Oracle DB, PostgreSQL, MySQL.

Soft Skills: Agile Methodologies (Scrum), Team Leadership, Cross-functional Collaboration.

PROFESSIONAL EXPERIENCE

3PILLAR GLOBAL | Senior Software Engineer | 2021 – Present

ChatOps & Automation (PONOS): Engineered a Slack bot from scratch using Node.js to automate environment transitions (Test, Stage, Prod). Streamlined the creation of tags and build deployments, reducing manual intervention in the release cycle by 40%.

Enterprise Resource Management (REGIS & JPM): Developed and maintained mission-critical modules for judge panel management and operational workflows. Improved system reliability and performance by refactoring legacy code into scalable microservices.

Process Automation (Skyjenks): Developed Python-based automation scripts that replaced manual data management processes. Optimized productivity across departments and ensured 100% data accuracy in reporting.

Release Management: Acted as a core member of the Deployment Team, overseeing secure code promotion across staging environments. Standardized CI/CD practices to ensure low-risk, scalable release cycles for international clients.

Full-Stack Development (OLL): Led the end-to-end development of a transactional registration system, prioritizing usability and data integrity. Integrated Angular frontends with Oracle backends to handle high-concurrency reporting.

TGC – TECNOLOGÍA DE GESTIÓN Y COMUNICACIÓN | Software Developer | 2021 – 2021

Legacy Migration: Successfully migrated public sector application features from Java to Oracle APEX, improving database interaction speeds and UI responsiveness.

Technical Support: Provided Tier 3 support for specialized government applications, resolving critical bugs in production environments.

FREELANCE | Web Developer | 2019 – 2021

Custom Solutions: Designed and deployed responsive web applications using Angular and Vanilla JavaScript for small-to-medium businesses.

EDUCATION

Universidad Tecnológica de Chihuahua (UTCH) Bachelor of Engineering in Communication and Information Technologies | 2019
